  called intra-attention is an attention mechanism relating different
  positions\nof a single sequence in order to compute a representation of the
  sequence. Self-attention has been\nused successfully in a variety of tasks
```

Ask your question from the uploaded PDF

Now we can ask our question

Chunk 1 | Page 2 | File ./temp_NIPS-2017-attention-is-all-you-need-Paper.pdf

Chunk 2 | Page 6 | File ./temp_NIPS-2017-attention-is-all-you-need-Paper.pdf

Chunk 3 | Page 1 | File ./temp_NIPS-2017-attention-is-all-you-need-Paper.pdf

Assistant: An attention mechanism is a way of computing a new representation (the **output**) from a set of vectors.
It takes three inputs:

1. **Query** – a vector that represents what we are looking for.
2. **Keys** – a set of vectors that act as "addresses" or "identifiers" for the information we might use.
3. **Values** – a set of vectors that contain the actual information we want to combine.

The attention function produces the output as a weighted sum of the values, where the weights are derived from the similarity (often a dot-product) between the query and each key.

In the special case of **self-attention** (or intra-attention), the query, keys, and values all come from the same sequence, allowing the model to relate different positions within that sequence to build a richer representation.

Now, let us ask the question from second PDF

How can project manager impact an organization

Getting answer from second uploaded PDF

Chunk 1 | Page 0 | File ./temp_How project managers impact organizations (1).pdf

Chunk 2 | Page 0 | File ./temp_How project managers impact organizations (1).pdf

Chunk 3 | Page 3 | File ./temp_How project managers impact organizations (1).pdf

Assistant: Project managers impact an organization by adding value to projects in several key ways:

- **Focusing on the customer** – building relationships with customers, asking questions, and ensuring their needs are heard and satisfied.
- **Building a great team** – creating a strong, collaborative project team that can work effectively together.
- **Fostering relationships and communication** – maintaining open lines of communication with stakeholders and other organizations, which helps keep the team on track and on schedule.
- **Managing the project** – prioritizing tasks, delegating responsibilities, and communicating clearly to deliver value.
- **Breaking down barriers** – removing obstacles that impede progress, such as reaching out to other organizations when the team needs information or support.

By focusing on these areas, project managers can overcome obstacles, keep projects on schedule, and ultimately deliver value that benefits the entire organization.
